AODIUTools

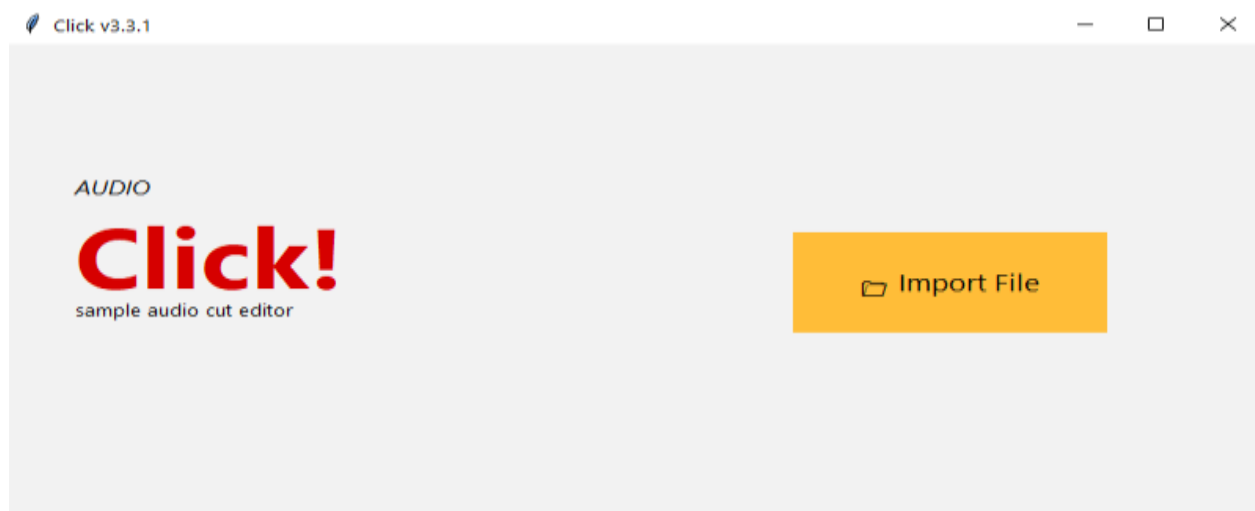

FILE - <https://drive.google.com/drive/folders/1li2kAEwHF5ijN3JyBLxkIFcL31jbdFLS?usp=sharing>

AODIUQuick

Shift + R – It will record system sound automatically, Pressed it again and it will save to Desktop\Recording (Folder) as wav as WAV for better performance than MP3

AODIUClick

A WAV editor to cut audios and export on what selected cut you wanted to cut.

Error: Can't be used at the moment. It needed to fix the STDN error and internal files error but it works before.

AODIUTick

COMING SOON – Still in development.

A system audio separator that separates Vocals & Instrumental to individual WAV file.

AODIURoute

COMING SOON – Still in development.

A system that supposed to enhance audio WAV performance, it can also edit with speed, pitch, file size etc.

Internet Penguin Pro v6

FILE - <https://drive.google.com/drive/folders/1D07qnz6jzaMG3D7Q7ZKLIMoMeskwkNE?usp=sharing>

A system that scanned your PC WIFI connections and Activating it will likely boosted your WIFI speed and bandwidth x2. You can choose what to enable and disable Optimization Engine Commands too. This is my 2nd Version of Internet Boost System.

Set-Things v6
